RITURAJ PRITISH

[Github](#)
[Portfolio](#)

Over five years of experience building and delivering effective and efficient solutions for the frontend. Looking forward to working as a full stack developer to own the responsibility from development to deployment.

Work Experience

Newton Classroom

Hyderabad, India

Frontend Developer, Remote
November 2021 - November 2024

- Built comprehensive school management features including timetable, digital diary, noticeboard, communications (Email, SMS), admissions, finance, student records, grading, HR payroll, transportation, and reporting systems.
- Implemented robust security through configuration-based, role-based access control (RBAC), and permissions-based features.

Enspara

Cape Town, South Africa

Frontend Developer, Remote
April 2020 - Aug 2021

- Worked on a progressive web app with heavy offline usage. worked together with the team to overcome challenges with IndexedDB and browsers reducing monthly crash reports by 60%
- Developed UI component library with a design system from scratch using Figma for mockups, styled-component, and TailwindCSS to style and storybook to test/develop rapidly
- Successfully refactored and migrated old codebase to modern react with hooks
